

The Breast Academy Gold Coast is in the process of finalising positions in the Fellowship program for the 2017/18 period. The program offers paid fellowships with durations between 6-12 months. The fellowship offers “hands on” exposure to aesthetic breast surgery with a graded responsibility based on achieving learning objectives. The fellowship program, based at Pacific Private Hospital, is supervised by Dr Craig Layt and Dr Luke Stradwick with added exposure to their private practices as well as those of other reputable surgeons. This allows for education in not only the technical but also the business side of running an aesthetic practice. The goal of the Breast Academy Fellowship program is lifelong learning and continued professional development with a focus on breast augmentation and aesthetic breast surgery. Our mentoring program allows Plastic Surgeons wishing to further build on skills gained during SET training to draw on the technical experience of senior surgeons. The Breast Academy fellowship is unique in that it is a “hands-on” fellowship with supervision provided by senior plastic surgery mentors with access to a large number of aesthetic cases.

All program applicants must have successfully completed the FRACS (plastics) or its equivalent.

The principles of the Breast Academy are to advocate for aesthetic breast surgery to be performed by well-trained and qualified plastic surgeons in Australia with appropriate follow-up care. Fellows will be expected to adopt this ethos and carry it forward into their careers as surgeons and teachers sharing their knowledge where appropriate. Those surgeons completing the Breast Academy Fellowship program will be equipped with the skills to take a leadership role in defining the standard of care expected of those surgeons choosing to perform aesthetic breast surgery. We would like to invite you to apply.

Dr Layt (0418210020) and Dr Stradwick (0423506792) are available to discuss any aspects of the program with interested surgeons.

Please forward your application though to Clinic Manager Kate Sullivan [kate@breastacademy.com.au](mailto:kate@breastacademy.com.au)
